

Weekly Progress Report

Team#: 8

Project Name: Attendin

Team Members: Dominic Iquina, Mutazz Zeidan

Advisor: Elizabeth Pawley

Date: Monday – November 3, 2025

What was accomplished last week:

Worked a bit on a style guide but want to focus on color consistency between UI elements so I really would like to define when colors should be used. Good example is our primary (dark blue) color used in pressing confirmation buttons with our secondary color (cyan blue) used for canceling. I tried limiting our scope to only 5 colors per theme so we're going to have to tweak some designs to fit the new self-imposed constraints.

Our current (light mode) color palette if you were curious!

Plans for coming week:

- Continuing off more from last week with updating more requirements along the way.
- Maybe start implementing a widget?
- Possibly begin preparing for my presentation that's in ~2-4 weeks (Dominic and I are in different sections, so his presentation was earlier than mine and each have slightly different requirements)

Issues or concerns:

N/A

Advisor comment(s): Love the color pallet! Let me know if you want to run your presentation by me/want an audience and feedback beforehand.
